## QUARTERLY REPORT 31 MARCH 2007

---

### MAGNUM MINING AND EXPLORATION LIMITED (ASX:MGU.AX)

---

#### HIGHLIGHTS

- **Approval of Transfer of Mining Licence at Tantalite Valley Project, Namibia**
- 

#### OPERATIONS

##### **Tantalite Valley Project, Namibia**

During the quarter it was announced that the company was advised in writing that the Honourable Minister of Mines and Energy for Namibia has approved the application for the transferral of Mining Licence 77 from Tantalite Valley Minerals to Tameka Shelf Company Four (Pty) Ltd (“Tameka”), a fully owned subsidiary of Magnum,

The Tantalite Valley project is located on Mining Licence 77, located near Karasburg and Warmbad, within the Magisterial district of Karas in the south of Namibia.

Magnum is acquiring the Tantalite Valley project under the terms set out in the announcement dated 11 May 2006 and as at the General Meeting of shareholders dated 31 July 2006. Magnum will pay an amount of N\$8 million (A\$1.46 million) in cash and has previously issued 15 million fully paid ordinary shares in Magnum as consideration. The shares issued pursuant to the purchase have been held in voluntary escrow which will be delivered to the counterparties upon settlement of the acquisition.

The approval of the Transfer is the final outstanding condition precedent for the acquisition to proceed, and the Company will now liaise with the Namibian Ministry of Mines and Energy to affect the transfer of the Mining Licence 77, and will proceed to settlement of the purchase at the earliest possible date.

##### **Bunawan Project, Philippines**

The results of diamond drill hole BUN-001, which was completed in the last quarter, were reviewed. Drill hole BUN-001 is located in the Maboyo Prospect where outcropping epithermal quartz veins are associated with copper and gold anomalism in stream sediments. The hole was designed to test for epithermal quartz vein mineralization in the upper part of the hole and possible indications of porphyry copper-gold mineralization in the lower part of the hole. Between 117.5 – 124.0m down-hole a zone was intersected with quartz veins and low grade gold mineralization between 0.20 – 0.50 gpt Au.

## Notes

- 
- 1 This quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
  - 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
  - 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
  - 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
  - 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
